

Live-video interpreter solution

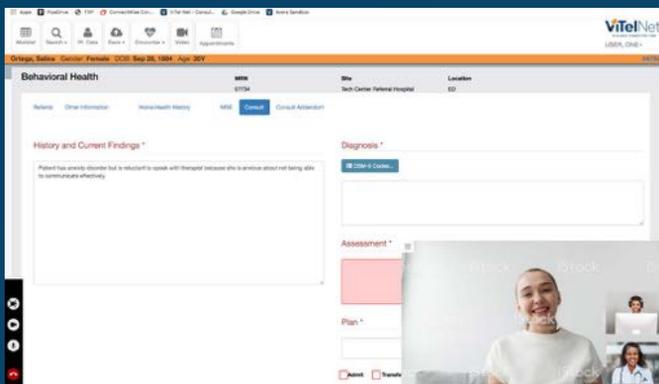

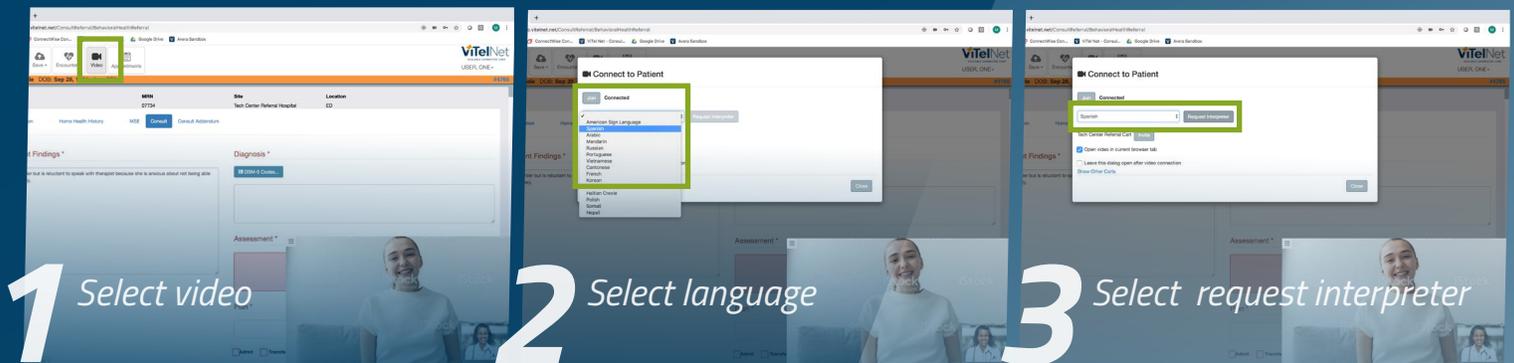

ViTel Net and Language Services Associates (LSA) have partnered for immediate interpreter access for clinicians during telehealth encounters.

- + Qualified medical interpreters, supporting the 16 most commonly spoken languages
- + Secure, optimal audio & visual connection
- + Quick, easy connection integrated into any telehealth specialty

Relevant US Data

- + 67.3 million (21.9%) speak a language other than English at home
- + 11 million people are functionally deaf
- + Studies show using interpreters decrease the length of hospital stays and reduce readmission rates with limited-English proficiency (LEP) patients.

Just 3 clicks

You're connected!

ViTelNet

SCALABLE CONNECTED CARE

- + Interoperable platform connecting clinicians to patients in any care setting
- + Clinicians access medical images, patient data, and live video feed to remotely diagnose, treat, and manage patients across care continuum

POWERED BY

Language Services
ASSOCIATES

- + Industry leader and full-service interpretation and translation solutions provider
- + Thousands of clients connect to a worldwide roster of highly qualified interpreters, speaking 240+ languages

The single, most important thing is patient outcomes

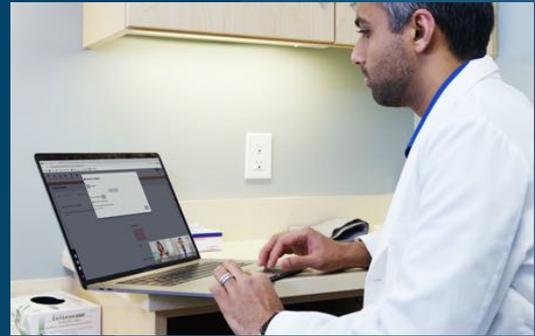

Patient-clinician communication is critical

Improve outcomes & satisfaction
Enhance care
Reduce readmissions & costs

When clinicians care for limited-English proficient and deaf patients, misunderstandings can occur - sometimes with devastating results.

Interpreters remove the language barriers.

We simplify the connection within the telehealth platform, forging a live videoconference with an interpreter - faster and easier than ever before!

ViTel Net Advantage	Why that matters
Interpreter-on-demand – within your clinical workflow	Greater clinician efficiency <ul style="list-style-type: none"> + Click to connect + No fumbling with additional devices + No unnecessary delays + Secure connection
